

GUI MAIL READER(U0HBird)

Steps to compile and execute the GUI Mail Reader Program :

1. Compile all the .java files together by using the command on Terminal : **javac *.java**.
2. Now first run the Server program by using command : **java Server**.
3. Let the Server keep running and Open another terminal for executing GUI by command : **java GUI**.
4. Now as soon as you run the GUI program parallel to the server , a GUI window will pop up..Thats our GUI Mail Reader...
